

What is claimed is:

1. A cabinet assembly, comprising:  
a housing including a first wall having an opening disposed therein, and a second  
wall having at least one access port disposed therein; and  
5 a module positioned within the housing and removable from the housing through  
the opening, the module having at least one compartment alignable with the at  
least one access port, wherein the at least one compartment is accessible  
through the second wall.
2. The assembly of Claim 1, wherein the module includes at least one slide track, and  
10 wherein the housing includes at least one roller operatively coupled to the at least one slide  
track.
3. The assembly of Claim 1, wherein the first and second walls are approximately  
orthogonal.
4. The assembly of Claim 1, wherein the at least one compartment is adapted to  
15 contain at least one of a soap dispenser, a lotion dispenser, a tissue dispenser, or a paper  
towel dispenser.
5. The assembly of Claim 1, wherein the at least one access port comprises a trash  
receptacle, and wherein the at least one compartment is adapted to receive an article of trash.
6. The assembly of Claim 1, further comprising a device for locking the module in the  
20 housing.
7. An amenities cabinet device, comprising:  
a housing having an opening; and  
a module being slideably received within the housing,

wherein the module includes a plurality of amenity compartments, and the housing includes ports for accessing the plurality of amenity compartments included within the module.

8. The amenities cabinet device of Claim 7, wherein the module includes at least one slide track, and wherein the housing includes at least one roller operatively coupled to the at least one slide track.

9. The amenities cabinet device of Claim 7, wherein the ports are disposed in a first wall of the housing, and wherein the opening is disposed in a second wall of the housing.

10. The amenities cabinet device of Claim 9, wherein the first and second walls are approximately orthogonal.

11. The amenities cabinet device of Claim 7, further comprising a module cart configured to transport the module.

12. The amenities cabinet device of Claim 11, wherein the module cart slideably receives the module.

13. The amenities cabinet device of Claim 11, wherein the module cart includes wheels.

14. The amenities cabinet device of Claim 7, wherein the plurality of amenity compartments are configured to store two or more of a soap dispenser, a lotion dispenser, a tissue dispenser, or a paper towel dispenser.

15. The amenities cabinet device of Claim 7, further comprising a device for locking the module in the housing.

16. A lavatory unit, comprising:  
a cabinet assembly including

a housing including a first wall having an opening disposed therein, and a  
second wall having at least one access port disposed therein; and  
a module positioned within the housing and removable from the housing  
through the opening, the module having at least one compartment  
alignable with the at least one access port, wherein the at least one  
compartment is accessible through the second wall.

17. The lavatory unit of Claim 16, wherein the cabinet assembly comprises an  
amenities cabinet device, and wherein the module includes a plurality of amenity  
compartments, and the housing includes ports for accessing the plurality of amenity  
compartments included within the module.

18. The lavatory unit of Claim 16, wherein the at least one compartment is adapted to  
contain at least one of a soap dispenser, a lotion dispenser, a tissue dispenser, or a paper  
towel dispenser.

19. The lavatory unit of Claim 16, wherein the at least one access port comprises a trash  
receptacle, and wherein the at least one compartment is adapted to receive an article of trash.

20. The lavatory unit of Claim 16, further comprising a device for locking the module  
in the housing.

21. A vehicle comprising:

a lavatory unit having a cabinet assembly that includes:

a housing including a first wall having an opening disposed therein, and a  
second wall having at least one access port disposed therein; and  
a module positioned within the housing and removable from the housing  
through the opening, the module having at least one compartment

alignable with the at least one access port, wherein the at least one compartment is accessible through the second wall.

22. The vehicle of Claim 21, wherein the cabinet assembly comprises an amenities cabinet device, and wherein the module includes a plurality of amenity compartments, and  
5 the housing includes ports for accessing the plurality of amenity compartments included within the module.

23. The vehicle of Claim 21, wherein the at least one compartment is adapted to contain at least one of a soap dispenser, a lotion dispenser, a tissue dispenser, or a paper towel dispenser.

10 24. The vehicle of Claim 21, wherein the at least one access port comprises a trash receptacle, and wherein the at least one compartment is adapted to receive an article of trash.

25. An aircraft comprising:

a fuselage;

a propulsion system operatively coupled to the fuselage; and

15 at least one lavatory unit operatively disposed within the fuselage, the lavatory unit comprising:

a cabinet assembly that includes:

a housing including a first wall having an opening disposed therein, and a second wall having at least one access port disposed therein; and

20 a module positioned within the housing and removable from the housing through the opening, the module having at least one compartment alignable with the at least one access port, wherein the at least one compartment is accessible through the second wall.

26. The aircraft of Claim 25, wherein the cabinet assembly comprises an amenities cabinet device, and wherein the module includes a plurality of amenity compartments, and the housing includes ports for accessing the plurality of amenity compartments included within the module.

5        27. The aircraft of Claim 25, wherein the at least one compartment is adapted to contain at least one of a soap dispenser, a lotion dispenser, a tissue dispenser, or a paper towel dispenser.

28. The aircraft of Claim 25, wherein the at least one access port comprises a trash receptacle, and wherein the at least one compartment is adapted to receive an article of trash.

10       29. The aircraft of Claim 25, wherein the at least one compartment comprises a plurality of amenity compartments configured to store two or more of a soap dispenser, a lotion dispenser, a tissue dispenser, or a paper towel dispenser.

30. The aircraft of Claim 25, further comprising a device for locking the module in the housing.

15       31. A method for resupplying a lavatory in an aircraft, the method comprising:  
removing a first amenities module from an amenities cabinet in the lavatory; and  
inserting a second amenities module into the amenities cabinet,  
wherein the first and second amenities modules include a plurality of amenity compartments.

20       32. The method of Claim 31, wherein removing includes transporting the first amenities module out of the aircraft.

33. The method of Claim 31, wherein inserting includes transporting the second amenities module into the aircraft.

34. The method of Claim 31, wherein the first and second amenities modules are slideably received by the amenities cabinet.

35. The method of Claim 31, wherein the plurality of amenity compartments are configured to store two or more of a soap dispenser, a lotion dispenser, a tissue dispenser, or  
5 a paper towel dispenser.

36. A method of providing a lavatory unit within a structure, comprising:  
providing a cabinet assembly including a first wall having an opening disposed  
therethrough and a second wall having at least one access port;  
inserting a module into the cabinet assembly through the opening in the first wall,  
10 the module having at least one compartment disposed therein; and  
aligning the at least one compartment with the at least one access port.

37. The method of Claim 36, wherein inserting a module into the cabinet assembly includes inserting an amenities module into the cabinet assembly, the amenities module including a plurality of compartments adapted to contain at least one of a soap dispenser, a  
15 lotion dispenser, a tissue dispenser, or a paper towel dispenser.

38. The method of Claim 36, wherein inserting a module into the cabinet assembly includes inserting a trash module into the cabinet assembly, and wherein the at least one compartment is adapted to receive an article of trash.

39. The method of Claim 36, wherein providing a cabinet assembly including a first  
20 wall and a second wall includes providing a cabinet assembly having a first wall that is accessible from within the lavatory unit and a second wall that is accessible from outside the lavatory unit.
